TSplus Remote Access v15 Installation

Run TSplus Remote Access Setup program and then follow the installation steps.

You can then select your language (possible to change it later)

You can then select two custom options by checking the corresponding boxes: Recommended or Advanced

The Advanced option allows you to:

- * Not install TSplus Advanced Security.
- * Use custom proxy settings.
- * Download only the installer, which does not install TSplus.
- * Change default ports (not recommended).

Click on Next.

Web servers are listening on ports 80 and 443 by default. We recommend you to accept our TSplus default installation settings. According to our experience, most of the production issues are due to Windows security features.

You can still modify these ports if you wish during installation or at any time on the <u>Built-in Web Server Management of</u> the AdminTool. Just make sure that the defined ports are available and that Java is installed on the server.
