

# Advanced - Ransomware Settings

The **Ransomware** tab allows you to *configure the snapshot properties and define ignored file extensions* for the Ransomware Protection feature.

**Snapshot Path:** Define the directory where Ransomware Protection stores file snapshots.  
Default value is: C:\Program Files (x86)\TSplus-Security\snapshots

**Ignored Extensions:** By default, Ransomware Protection ignores well-known extensions of temporary files for ransomware activity. [See the list here](#). You can define custom extension names on the value field (semicolon separated):

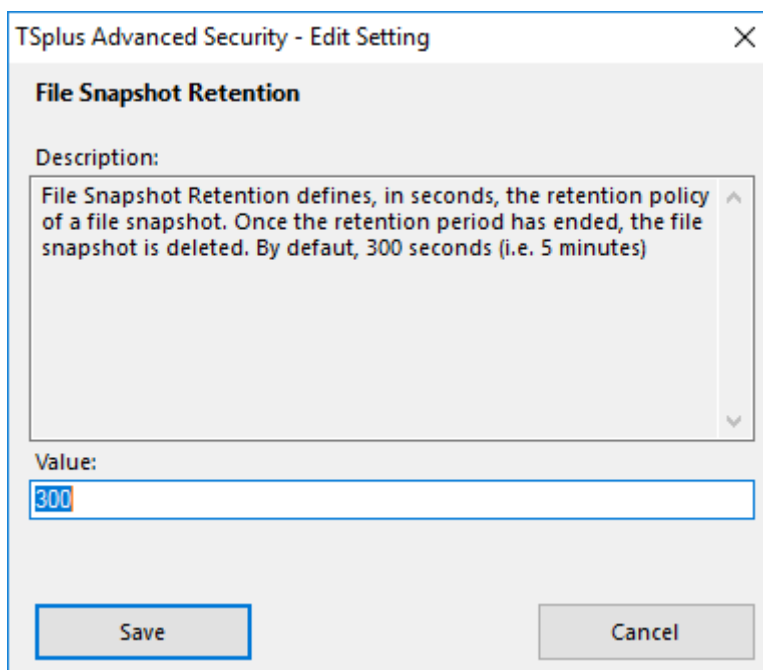

The screenshot shows a dialog box titled "TSplus Advanced Security - Edit Setting". The main heading is "Ignored Extensions". Below it, the "Description:" field contains the text: "By default, Ransomware Protection ignores well-known extensions of temporary files when looking for ransomware activity. This setting allows you to define custom ignored extensions. (semicolon separated)". Below the description is a "Value:" field, which is currently empty. At the bottom of the dialog are two buttons: "Save" and "Cancel".

**File Snapshot Max Size:** File Snapshots Max Size defines the maximum space allowed to retain file snapshots. The size is expressed in percentage of total available space on the disk where Snapshot Path resides.

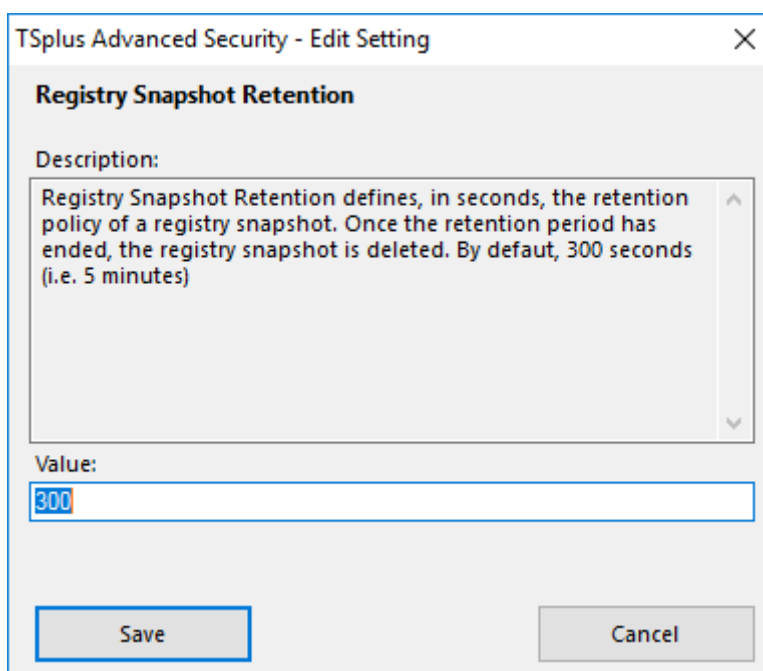

The screenshot shows a dialog box titled "TSplus Advanced Security - Edit Setting". The main heading is "File Snapshots Max Size". Below it, the "Description:" field contains the text: "File Snapshots Max Size defines the maximum space allowed to retain file snapshots. The size is expressed in percentage of total available space on the disk where Snapshot Path resides." Below the description is a "Value:" field, which contains the number "1". At the bottom of the dialog are two buttons: "Save" and "Cancel".

**File Snapshot Retention:** File Snapshot Retention defines, in seconds, the retention policy of a file snapshot. Once the retention period has ended, the file snapshot is deleted. By default, 300 seconds (i.e. 5 minutes)

**Registry Snapshot Retention:** Registry Snapshot Retention defines, in seconds, the retention policy of a registry snapshot.

Once the retention period has ended, the registry snapshot is deleted. By default, 300 seconds (i.e. 5 minutes)

**Allowed PowerShell and CMD scripts:** Allowed PowerShell and CMD scripts lists the complete file paths of the PowerShell and CMD scripts allowed to be executed on the machine.

The execution of allowed scripts won't trigger the Ransomware protection (semicolon separated).
