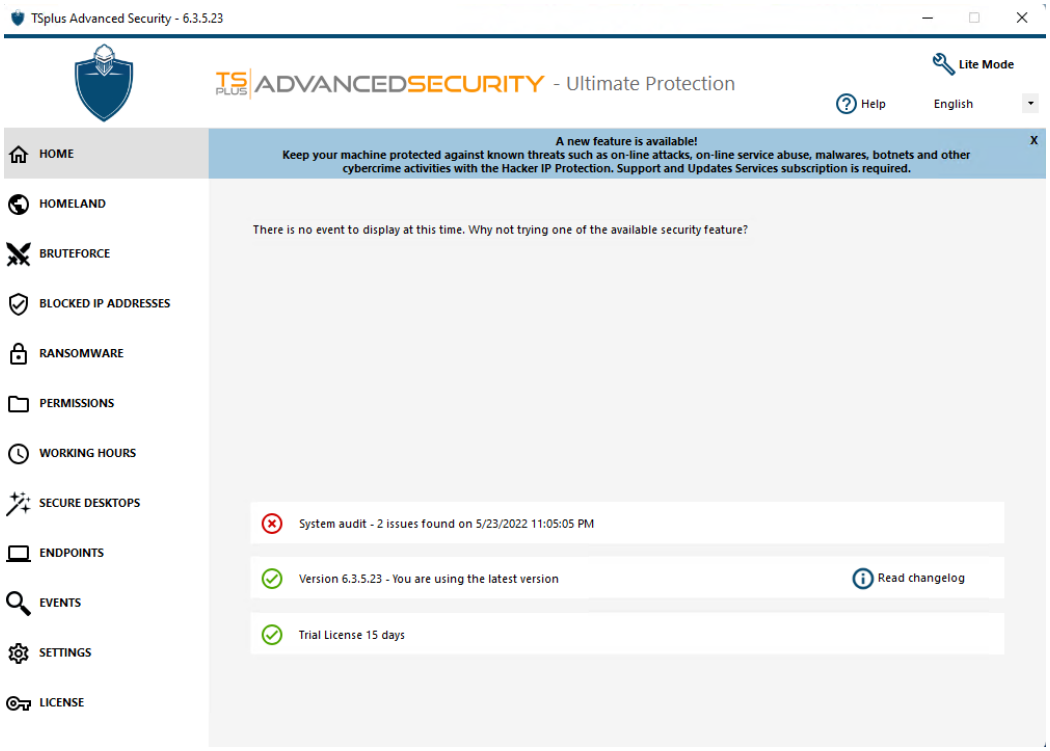
System Audit

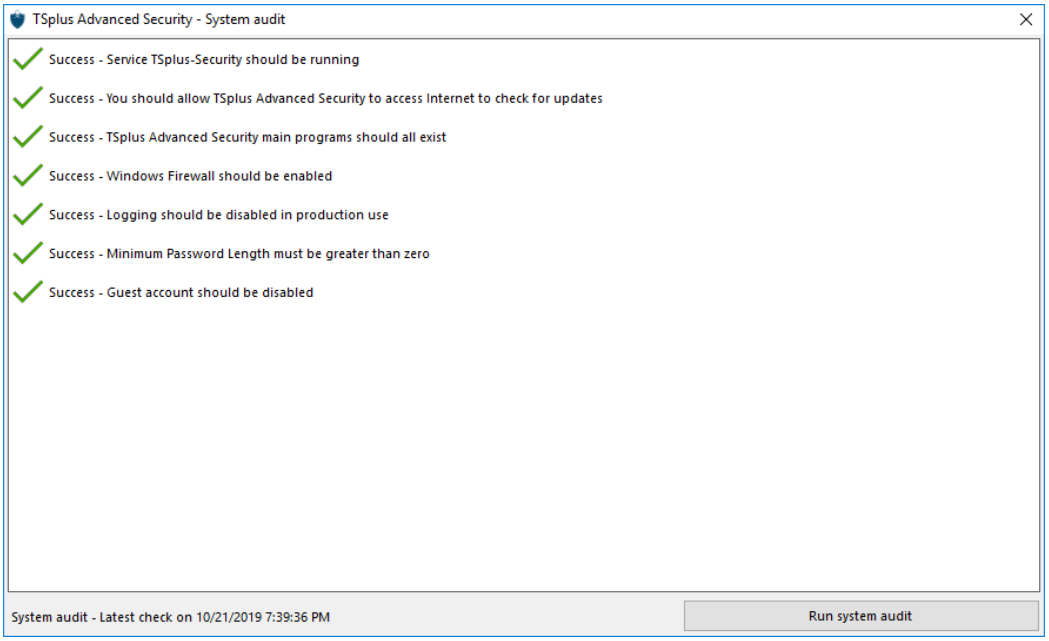
TSplus Advanced Security offers a System Audit located on the AdminTool dashboard.

The icon on the System Audit button turns red when an issue has been found. Please review them carefully.



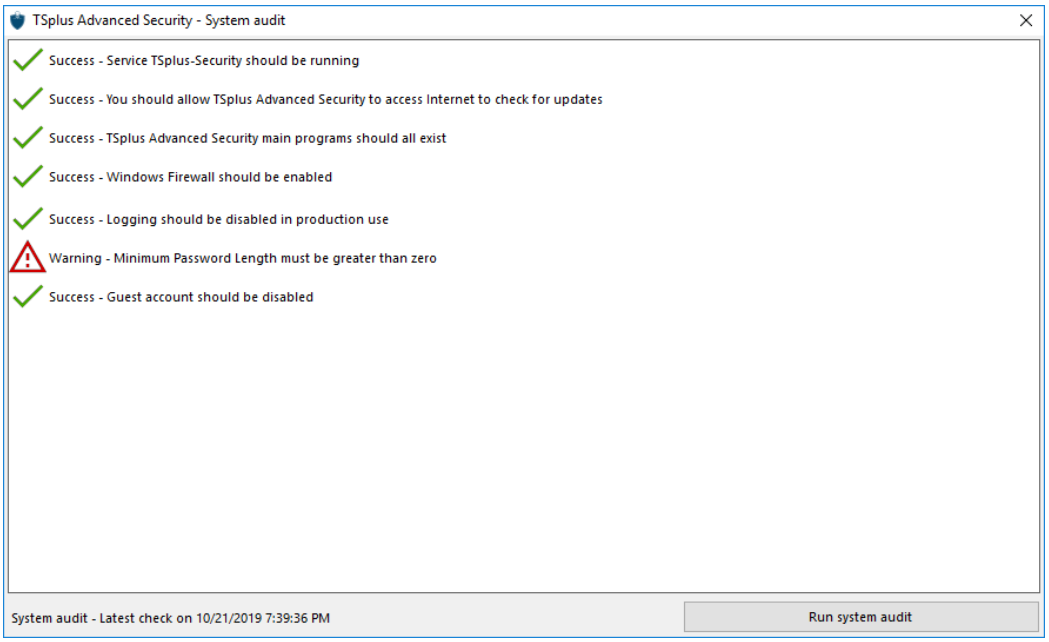
When you click on the system audit tile, you can see that it monitors:

- TSplus Advanced Security service is running.
- TSplus Advanced Security has access to the internet and is allowed to check for updates.
- TSplus Advanced Security main programs exist.
- Windows Firewall is enabled. This audit rule is not checked should Advanced Security be configured to use the built-in firewall.
- Logging is disabled.
- Windows minimum password length is greater than zero.
- Guest account is disabled.

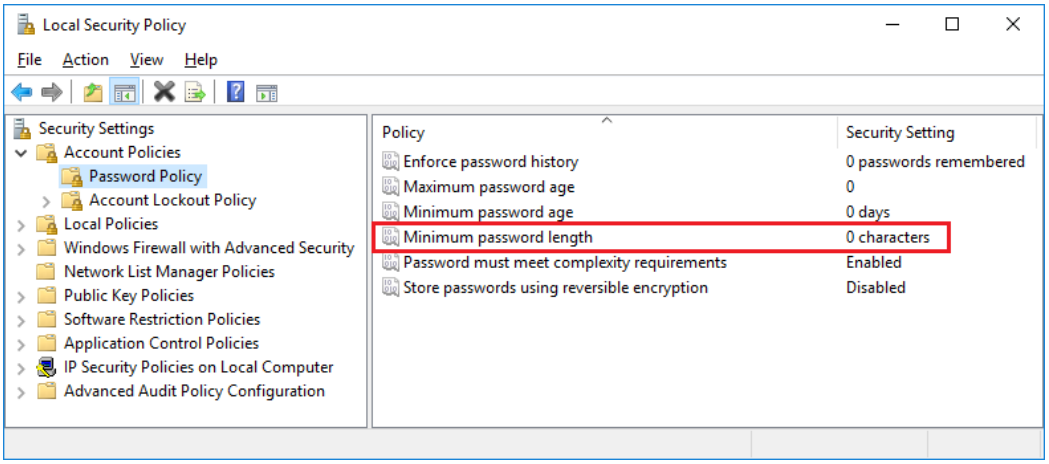


Fixing Minimum Password Length issue

The Minimum Password Length audit rule is implemented to alert administrators that an account may not have a password, which make intrusion very likely to happen in case the machine is facing the internet.



Please modify the minimum password length on your server, under Local Policy/Account Policies/Password Policy, to fix this major security issue:



Local Security Policy
File Action View Help
Security Settings
Account Policies
Password Policy
Account Lockout Policy
Local Policies
Windows Firewall with Advanced Security
Network List Manager Policies
Public Key Policies
Software Restriction Policies
Application Control Policies
IP Security Policies on Local Computer
Advanced Audit Policy Configuration
Policy
Security Setting
Enforce password history
0 passwords remembered
Maximum password age
0
Minimum password age
0 days
Minimum password length
0 characters
Password must meet complexity requirements
Enabled
Store passwords using reversible encryption
Disabled
