

Application usage per server and user Report

This report is available by clicking on **Servers > Reports** tile, then on the **Application usage per server and user** link from the left menu

The screenshot shows the TSplus Server Monitoring web interface. The top navigation bar includes tiles for Home, Servers, Reports (highlighted with a red box), Websites, Alerts, and Settings. The left sidebar menu lists various report categories, with 'Application usage per user && server' highlighted in red. The main content area displays the 'Application Usage per server and user' report for the server 'WIN-LBAGL4US301' and user 'Caleb' from 3/1/2022 to 3/16/2022. The report table shows the following data:

Process	Server Monitoring (WIN-LBAGL4US301)	Total Server Monitoring (WIN-LBAGL4US301)
AdminTool		
alternateshell.exe	279	279
Application Frame Host		

At the bottom of the interface, a status bar indicates 'Version: 5.1.3.15' and 'Valid Permanent License (25 Servers and Websites)'.

The **Application usage per server and user Report** displays the application usage per user for the specified server(s) and period of time.

The data can be filtered by server name and date range.
