

# Web logon page: How to change the logon Splashscreen

## Overview

When the remote connection is loading, the HTML5 client is displaying a default splashscreen such as the screenshot below:

You can customize this content by modifying a JavaScript configuration file.

## HTML5 Client

### Creating your customized Splashscreen content

Any content in text or HTML can be used for the Splashscreen.

Also, if you need to use simple quotes ( ' ) or double quotes ( " ) you will have to write a backslash before ( \ ' and \ " ) instead of just the quotes.

Finally, please note that the content must be written in only 1 line.

**The following example is a valid content for the Splashscreen:**

It will display a title ("This is my customized splashscreen"), a text ("Please say hello!") and the animated ring picture as in the standard TSplus Splashscreen.

### **Modifying the Splashscreen data to use your own content**

*If you do not have a file named "settings.js" in the "C:\Program Files (x86)\TSplus\Clients\www\software\html5" folder, then your TSplus version is older and this documentation does not apply. Please update your system first or contact support.*

Edit the file "settings.js" located in the "C:\Program Files (x86)\TSplus\Clients\www\software\html5" folder. We advise you to use a text editor such as Notepad or Notepad++ (do *not* use Word).

Search for the line starting by this:

```
W.splashscreencontent = "
```

Replace it completely by the following line:

```
W.splashscreencontent = "your customized content here";
```

Do not forget the ending double quotes and semi-colon (";").

If you wish to lengthen the duration of the logon splashscreen in HTML5, you can do so by modifying the value in milliseconds:

```
W.splashscreentime = 5000; //splash screen play time.
```

**We recommend you clear your browser's cache after saving the changed html page.**
